PROFESSIONAL SUMMARY

Senior React Native Engineer with 14+ years of software development experience, including 6+ years building and shipping production React Native applications. Specialized in multi-app commerce and point-of-sale ecosystems, native iOS and Android integrations, payment terminals, peripheral connectivity, offline-first architecture, and performance optimization. Experienced in leading mobile delivery from technical planning through App Store and Google Play release.

TECHNICAL SKILLS

React Native & Mobile Engineering

- Core: React Native (New Architecture: Fabric, TurboModules) | TypeScript | JavaScript | Native module development and native bridging | iOS (Swift, Objective-C) | Android (Kotlin, Java)
- Payments & Device Integration: Clover | Dejavoo | PAX | Sunmi | Tap to Pay | BLE, USB and Wi-Fi printers (Sunmi, Star Micronics) | Barcode scanning | Camera workflows
- Architecture & State: Modular and multi-app architecture | Offline-first architecture and data synchronization | Redux | Zustand | TanStack Query (React Query) | Performance profiling and optimization
- Testing & Delivery: Jest | React Native Testing Library | Fastlane | Git | Gradle

Additional Technical Experience

- Backend & APIs: Node.js | Express | .NET | REST APIs | GraphQL | WebSockets | Socket.IO | SignalR
- Data, Cloud & Analytics: PostgreSQL | MongoDB | MySQL | Couchbase | Firebase | Google Cloud Platform (GCP) | Pendo
- Other Technologies: React | Java | Spring | Unity | C#
- English: Working proficiency (reading, writing, and text-based communication)

WORK EXPERIENCE

Levinci Group — **NailSoft** SaaS point-of-sale & booking platform for U.S. nail salons

Senior React Native Engineer · 03/2021 – 06/2026

- Built and shipped a five-app React Native ecosystem—Merchant, Booked By, SalonSoft, Check-in and Retailer—supporting salon operations, consumer booking, staff workflows, in-store check-in and retail in collaboration with a cross-functional team of ~20 across product, backend and QA.
- Developed reusable native modules in Swift and Kotlin to connect the apps to Dejavoo payment terminals and Star Micronics and Sunmi receipt printers over BLE, USB and Wi-Fi, exposing vendor SDKs through a unified JavaScript API shared across the ecosystem.
- Migrated two production apps to the React Native New Architecture (Fabric, Turbo Native Modules), including rewriting existing bridge modules as Turbo Native Modules.
- Led performance optimization across five apps by profiling startup time, list rendering and unnecessary re-renders, then implementing fixes in the shared codebase.
- Owned end-to-end mobile delivery: technical planning, feature development, version management and releases on the Apple App Store and Google Play.
- Product links: iOS | Android

Levinci Group — Jollibee Vietnam digital ordering ecosystem
Senior React Native Engineer · 2020 – 2021

- Built and shipped three React Native applications—Jollibee Consumer, Jollibee Driver and Jollibee Merchant—supporting customer ordering, delivery operations and merchant workflows.
- Integrated GraphQL APIs and cross-app push notifications to synchronize order events and status updates across the consumer, driver and merchant applications.
- Developed key consumer features including Google-powered address search and maps, real-time chat, product browsing, voucher redemption, order creation and order tracking.
- Owned mobile builds, version management and releases on the Apple App Store and Google Play.
- Product links: iOS | Android

Công ty TNHH Dịch Vụ Và Giải Pháp Công Nghệ Đông Nam Á — Full-Stack Engineer · 2018 - 2020

- Built Spa Diva, a cross-platform booking application, developing the React Native mobile experience and Node.js backend services.
- Developed client-side features for Battle for Rolephia, a MOBA game, using Unity and C#.

Creants Studio — Full-Stack Engineer · 2015 - 2018

- Built a cross-platform news-reading application with React Native, delivering mobile features for iOS and Android.
- Maintained and enhanced backend services for MU OF HEROES using Java and Spring, supporting ongoing game operations and system stability.

Microgame Corp — iOS Engineer · 2012 - 2015

- Developed and maintained the iOS application for Ola, a social chat platform, using Objective-C.
- Integrated REST APIs and web-based games into the iOS application, supporting connected social and entertainment experiences.

EDUCATION

University of Science, VNU-HCM · B.Sc. in Information Technology · 2008 - 2012
